

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

CT MANAGED BOND FUND (THE "FUND")

Class T Income Shares (GBP) GB00BMGRVT43, a sub-fund of Columbia Threadneedle Opportunity Funds (UK) ICVC (the "Company"), regulated by the FCA.

This sub-fund is managed by Threadneedle Investment Services Limited (the "Management Company") (part of the Columbia and Threadneedle group of companies).

Objectives and Investment Policy

- The Fund aims to provide income with potential for long term capital growth. It looks to outperform a composite index over rolling 3-year periods, after the deduction of charges. This composite index comprises:
  - 56% Bloomberg Global Aggregate ex GBP (GBP Hedged) Index,
  - 24% Bloomberg Sterling Aggregate Index,
  - 10% MSCI ACWI ex UK Index,
  - 5% FTSE All-Share Index,
  - 5% Sterling Overnight Index Average (SONIA)
- The Fund is actively managed, and invests at least 80% of its assets in other funds.
- The Fund usually invests in other Columbia Threadneedle funds, however, funds managed by companies outside the Columbia Threadneedle group may also be held, when this is considered appropriate. These funds may invest worldwide.
- The Fund focuses on investment in funds providing exposure to bonds (including corporate and government bonds), and to a lesser extent, funds investing in equities (company shares).
- The balance of the exposure between these different asset types may vary over time, however, equity exposure will usually not exceed 20% of the Fund's value, under normal market conditions.
- The Fund may also hold money market instruments, deposits, cash, and near cash.
- Derivatives may be used with the aim of reducing risk or managing the Fund more efficiently, and up to 20% of the value of the Fund may be invested in funds that use derivatives for investment purposes. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets.
- The composite index is representative of the Fund's investment exposure, and provides a suitably weighted target benchmark of global investment grade bonds (hedged to sterling), investment grade sterling-denominated bonds, global equities (excluding the UK), UK equities, and cash, against which Fund performance can be evaluated over time.
- Any income the Fund generates will be paid to you, unless you have chosen to have it reinvested.
- You can buy or sell shares in the Fund on any day that is a business day in London. You can find more detail on the investment objective and policy of the Fund in the Prospectus. For more information on investment terms used in this document, please see the Glossary available at columbiathreadneedle.com.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk,  
Typically lower rewards

Higher Risk,  
Typically higher rewards

- The Fund is rated 4 because historically it has shown a medium level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- As this Fund invests into other Funds you should consider the underlying investments and overall risks.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund invests in securities whose value would be significantly affected if the issuer refused, was unable to or was perceived to be unable to pay.
- Changes in interest rates are likely to affect the Fund's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- The Fund may invest in derivatives (complex instruments linked to the rise and fall of the value of other assets) with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- All the risks currently identified as being applicable to the Fund are set out in the "Risk Factors" section of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry Charge:	0.00%
Exit Charge:	0.00%

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the fund over a year

Ongoing Charges:	0.64%
------------------	-------

### Charges taken from the fund under certain specific conditions

Performance Fee:	NONE
------------------	------

The ongoing charges figure is based on expenses for the year ending 25/05/24. This figure may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

For more information about charges please see the Fund's prospectus.

## Past Performance

Source: Morningstar

Past performance is not a guide to future performance.

Fund launch date: 09/04/2021

Share/unit class launch date: 09/04/2021

Performance is calculated in GBP.

All charges and fees, except any entry, exit and switching charge, have been included within the performance.

This chart shows how much the Fund increased or decreased in value as a percentage each year.

◇ Past performance before share class launch date includes data for another share / unit class or fund with similar characteristics.

△ Before this date the Fund had different characteristics.

Please refer to [www.columbiathreadneedle.com](http://www.columbiathreadneedle.com) for further details.

Please note that the target benchmark was introduced on 7 May 2020, therefore performance before this period is not available. Performance of the Fund before 9 April 2021 is based on the Threadneedle Managed Bond Fund, a unit trust which was merged into the Fund on that date.

\*Bloomberg Global Aggregate ex GBP (GBP Hedged) (56%), Bloomberg Sterling Aggregate (24%), MSCI ACWI ex UK (10%), FTSE All-Share (5%), Sterling Overnight Average (SONIA) (5%)

## Practical Information

- Depositary: Citibank UK Limited.
