CT (LUX) SUSTAINABLE OUTCOMES GLOBAL EQUITY (THE "FUND")

Class IG (GBP Accumulation Shares) LU2282710982, a sub-fund of Columbia Threadneedle (Lux) II (the "SICAV"), regulated by the CSSF.

The management company of the SICAV is Threadneedle Management Luxembourg S.A. (the "Management Company") (part of the Columbia and Threadneedle group of companies).

Objectives and Investment Policy

- The Fund aims to increase the value of your investment over the long term by investing in companies that are delivering positive sustainable outcomes for the environment and/or society through their products and services, and display strong environmental, social and governance (ESG) practices.
- It looks to outperform the MSCI ACWI Index over rolling 5-year periods, after the deduction of charges.
- The Fund invests a minimum of 90% of its assets in shares of companies worldwide, including shares of companies in emerging markets which may represent a core part of the Fund's investments.
- The Fund may use derivatives (complex instruments) for hedging purposes and may also invest in asset classes and instruments different from those stated above.
- The fund manager only selects companies that align with at least one of the Fund's environmental or social themes, which are directly linked to the UN Sustainable Development Goals (SDGs), as outlined in the Fund's Sustainable Outcomes Investment Guidelines. The fund manager also ensures that the companies it invests in follow good governance practices.
- The Fund excludes companies that derive certain levels of revenue from industries or activities that the fund manager considers are contrary to the goals of making positive contributions to society and/or the environment. It also excludes companies determined to have breached international standards and principles.
- The fund manager engages with companies to encourage positive sustainable outcomes. Columbia Threadneedle Investments is a signatory to the Net Zero Asset Managers Initiative and has committed to an ambition to reach net zero emissions by 2050 or sooner for a range of assets, including the Fund. The fund manager uses its proactive engagement to assist with progressing this and may disinvest from those not meeting the minimum standards.
- The Fund is actively managed in reference to the MSCI ACWI Index. The index is broadly representative of the companies in which the Fund invests and provides a suitable target index against which Fund performance will be measured and evaluated over time. The index is not designed to measure whether the Fund attains the sustainable objective. The fund manager has discretion to select investments with weightings different to the index, and that are not in the index, and as a result of its sustainable investment objective, the Fund will display significant divergence from the index.
- Further information on the Fund's investment guidelines and its sustainable investment objective is available in the Sustainable Outcomes Investment Guidelines and the SFDR RTS Annex of the Prospectus, both available at www.columbiathreadneedle.com. The Fund is considered to fall within the scope of Article 9 of SFDR.
- Income from investments in the Fund will be added to the value of your shares.
- You can buy or sell shares in the Fund on any day which is a business day in Luxembourg unless the directors have decided that insufficient markets are open. You can find more detail on the investment objective and policy of the Fund in the Prospectus. For more information on investment terms used in this document, please see the Glossary available at columbiathreadneedle.com.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk,
Typically lower rewards

Higher Risk,
Typically higher rewards

- The Fund is rated 6 because historically it has shown a high level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund invests in markets where economic and regulatory risk can be significant. These factors can affect liquidity, settlement and asset values. Any such event can have a negative effect on the value of your investment.
- The Fund has a concentrated portfolio (holds a limited number of investments and/or has a restricted investment universe) and if one or more of these investments declines or is otherwise affected, it may have a pronounced effect on the Fund's value.
- The Fund may invest in derivatives (complex instruments linked to the rise and fall of the value of other assets) with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- The Fund aims to invest in companies which deliver sustainable outcomes and in doing so adheres to a set of Sustainable Investment Guidelines. The Guidelines will affect the Fund's exposure to certain sectors, which may impact the performance of the Fund positively or negatively relative to a benchmark or other funds without such restrictions.
- An investment style bias can impact a fund's performance relative to its benchmark in a positive or negative way. No investment style performs well in all market conditions. When one style is in favour another may be out of favour. Such conditions may persist for short or long periods. A fund exhibits a growth style bias relative to its benchmark if the majority of the fund invests in companies with above average growth rates, or good growth potential (based on indicators such as earnings and sales growth) relative to its benchmark. However, there is no guarantee that such companies will continue to show such characteristics in the future. A fund's investment style may also change over time.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge:	0.00%
Exit Charge:	0.00%

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing Charges:	0.75%
------------------	-------

Charges taken from the fund under certain specific conditions

Performance Fee:	NONE
------------------	------

The ongoing charges figure shown here is an estimate of the charges because the historic figures do not accurately reflect the future ongoing costs. The UCITS' annual report for each financial year will include detail on the exact charges made.

For more information about charges please see the Fund's prospectus.
