CT (LUX) GLOBAL CONVERTIBLE BOND (THE "FUND")

Class I Shares (EUR Distribution Shares) LU0293751193, a sub-fund of Columbia Threadneedle (Lux) III (the "Company"), regulated by the CSSF.

This Fund is managed by Threadneedle Management Luxembourg S.A. (the "Manager")

Objectives and Investment Policy

- The objective is to achieve high returns in the value of your investment.
- The Fund seeks to achieve this by investing in convertible bonds (bonds that can be converted into a predetermined amount of the company's equity at certain times during its life, usually at the discretion of the bondholder). At least two thirds of the Fund's assets will be invested in convertible bonds issued by corporations in Europe, the US, Japan and Asia.
- The Fund normally holds at least 51% of its assets in convertibles that the Manager considers investment grade quality, subject to the convertible bond market providing sufficient 'balanced' investment grade investment opportunities to run a diversified portfolio. A balanced convertible is one that is not trading too far above its bond redemption value and/or that is not trading at too high a conversion premium.
- The Fund may enter into financial futures contracts (including equity index, interest rate and currency contracts), to protect it from adverse movements in equity markets, interest rates or currency exchange rates.
- The Fund is actively managed in reference to the FTSE Global Focus Customised TR Index. The index is broadly representative of the securities in which the Fund invests, and provides a suitable comparator benchmark against which Fund performance will be measured and evaluated over time. The fund manager has discretion to select investments with weightings different to the index, and that are not in the index, and the Fund may display significant divergence from the index.
- Any income the Fund generates will be paid to you.
- You can buy or sell shares in the Fund on any day which is a business day in Luxembourg and London. You can find more detail on the investment objective and policy of the Fund in the Prospectus. For more information on investment terms used in this document, please see the Glossary available at columbiathreadneedle.com.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund is rated 4 because historically it has shown a medium level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The indicator does not take into account the following risks:
 - Counterparty Risk: to gain greater income the Fund may deposit cash with various approved Counterparties. Return of the cash is dependent upon the continued solvency of the Counterparty.
 - Credit Risk: receiving income due from debt instruments is dependent upon the provider's ability to pay.
 - Currency Risk: your investment may be adversely affected by changes in currency exchange rates.
 - Interest Rate Risk: your investment may be adversely affected by changes in interest rates.
 - Market Risk: the value of assets held by the Fund may go down as well as up. There can be no assurances that the investment objectives of the Fund will be achieved.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the Prospectus.
