Morningstar Rating[†]

Fund objective and policy

The Fund aims to provide an income higher than the income generated by the composite index over rolling 3-year periods and a total return higher than the index over the long term (5 years or more), after the deduction of charges. The composite index currently comprises: 15% FTSE All-Share Index, 30% MSCI ACWI ex UK Index, 35% Bloomberg Global Aggregate ex Treasury (GBP Hedged) Index, 10% ICE BofA Global High Yield Constrained (GBP Hedged) Index, 10% Sterling Overnight Index Average (SONIA). The Fund is actively managed and invests at least 80% in a range of collective investment schemes and closed ended funds in order to gain exposure to a diversified portfolio of shares, fixed interest securities and alternative income producing investments, for the purposes of achieving income for distribution.

Risk warning

The value of investments and any income derived from them can go down as well as up as a result of market or currency movements and investors may not get back the original amount invested. Charges are taken from the capital of the fund, which will restrict capital growth potential. This fund invests principally in units of collective investment schemes. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.
