### Fund objective and policy

The Fund aims to achieve an increase in the value of your investment over the medium to long term, with a well-balanced risk profile. The Fund is actively managed and targets a return of ESTR +4% over a rolling 3-year period. It seeks to achieve its objective through exposure to a mix of assets such as equities including developing and smaller company markets, bonds and indirect investment in property and commodities. The Fund will invest mainly through a combination of investment in cash, Exchange Traded Funds, derivatives, listed certificates, swap contracts, currency and collective investments. The Fund may also invest in derivatives to obtain market exposure in excess of the net asset value of the Fund (NAV) or reduce it below the NAV, such exposure may vary at different times.

### Risk warning

The value of investments and any income derived from them can go down as well as up as a result of market or currency movements and investors may not get back the original amount invested. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.

## Glossary

## Active Engagement Report

We define engagement as dialogue between investors and companies with a focus on encouraging companies to address strategic issues including environmental, social and governance factors. The objective of such dialogue with companies is to reduce risk and support long-term performance. The table sets out, for the fund, the number of companies we have engaged with; the number of countries covered and the individual engagement themes.
