Fund manager

Pauline Grange

Sustainability Label

This product has a "Sustainability Focus" label: it invests mainly in assets that focus on sustainability for people or the planet. Sustainable investment labels help investors find products that have a specific sustainability goal.

Fund objective and policy

The Fund aims for long term capital growth, and to outperform the MSCI World Index over rolling 5-year periods, after the deduction of charges. It seeks to address sustainability challenges facing people and the environment by investing at least 90% in shares of companies providing solutions aligned to its 7 "Sustainability Themes": Energy Transition, Resource Efficiency, Sustainable Infrastructure, Sustainable Finance, Societal Development, Health and Wellbeing, Technological Innovation & Inclusion. These companies may be listed, quoted or traded anywhere in the world, and of any size. Each company is assessed and selected using Columbia Threadneedle's Standard of Sustainability, to ensure solutions provided not only align with the Sustainability Themes but are a material business driver. We exclude companies whose activities are harmful to the environment or society e.g. those with significant exposure to weapons, tobacco, coal, oil and gas. The Fund does not invest in companies breaching international standards.

Risk warning

The value of investments and any income derived from them can go down as well as up as a result of market or currency movements and investors may not get back the original amount invested. Screening out sectors or companies may result in less diversification and hence more volatility in investment values. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.

Investment Style

The Fund currently exhibits a growth style bias relative to its benchmark. This means the majority of the fund invests in companies with above average growth rates, or good growth potential (based on indicators such as earnings and sales growth) relative to its benchmark. A fund's investment style may change over time.

Glossary

Active Engagement Report	We define engagement as dialogue between investors and companies with a focus on encouraging companies to address strategic issues including environmental, social and governance factors. The objective of such dialogue with companies is to reduce risk and support long-term performance. The table sets out, for the fund, the number of companies we have engaged with; the number of countries covered and the individual engagement themes.
