Ratings/Awards

Fund Objective & Policy

The aim of the Fund is to provide income with the potential to grow the amount you invested over the medium to long term.  
The Fund will invest at least two-thirds of its assets so as to gain global exposure to company shares, bonds (which are similar to a loan and pay a fixed or variable interest rate) and property. The amount of the Fund that is invested in the different asset types will vary over time as the Fund seeks to achieve its aim.  
The Fund will invest in shares and bonds indirectly through regulated and unregulated funds. The Fund may also invest in these assets directly or indirectly by using derivatives. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets.  
The Fund's exposure to commodities and property will be gained indirectly through other funds, related securities, or by using derivatives. Commodities are physical materials such as oil, agricultural products, and metals.  
The Fund may use derivatives for the purposes of Efficient Portfolio Management and for investment purposes. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets.

Risk & Reward Profile

UCITS SRRI

The Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward. Please see the Key Investor Information Document for more information.

Key Risks

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- As this Fund invests into other funds you should consider the underlying investments and overall risks.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund invests in securities whose value would be significantly affected if the issuer refused, was unable to or was perceived to be unable to pay.
- Changes in interest rates are likely to affect the Fund's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- The Fund's assets may sometimes be difficult to value objectively and the actual value may not be recognised until assets are sold.
- The Fund may invest materially in derivatives (complex instruments linked to the rise and fall of the value of other assets). A relatively small change in the value of the underlying investment may have a much larger positive or negative impact on the value of the derivative.
- The value of a property is a matter of a valuer's opinion and the true value may not be recognised until the property is sold. Should material uncertainty apply to the value of properties that constitute more than 20% of the scheme property, it may be necessary to temporarily suspend dealing.
- The fund may exhibit significant price volatility.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the prospectus.

Typical Investor Profile

The Fund may be suitable for investors with a medium to long term investment horizon seeking income and potential capital appreciation, who are prepared to tolerate moderate to large price fluctuations. If investors are uncertain if the Fund is suitable for them, they are advised to contact a financial adviser.

Share classes in the table may not be open to all investors, please refer to the Prospectus for further information. Overall impact of costs: Costs and expected returns may increase or decrease as a result of currency and exchange rate fluctuations, if costs are to be paid in another currency than your local currency. The ongoing charges figure (OCF), exit charges (maximum amount to be deducted shown in the table above) and transaction costs show the percentage that may be deducted from your expected returns. The OCF is usually based on the last year's expenses, includes charges such as the Fund's annual management charge and operating costs. Transaction costs displayed are based on a three year average total and are calculated based on FYE Report and Account figures. Where the fund is less than 3 years old the transaction costs are based on proxy and actual costs. All transaction costs are as at 25/05/24. Additional distributor or intermediary fees may not be included. In some cases, the OCF may be based on an estimate of future charges. For a more detailed breakdown please visit [www.columbiathreadneedle.com/fees](http://www.columbiathreadneedle.com/fees).

Distribution History Of Share Class (Net)
