

This product has a 'Sustainability Focus' label. It invests mainly in assets that focus on sustainability for people or the planet. Sustainable investment labels help investors find products that have a specific sustainability goal.

Columbia Threadneedle Fund Management Limited

CT Sustainable Global Equity Income Fund

Product identifier: 991589
24 March 2025

Sustainability goal

- The Fund seeks to address sustainability challenges facing people and the environment by investing in companies that provide solutions aligned with its 7 "Sustainability Themes": as set out below.
- The Fund's Sustainability approach affects the Fund's available investment universe and its exposure to certain companies, industries and sectors. This may impact the relative performance of the Fund positively or negatively.
- In pursuing its Sustainability goal, the Fund may hold investments in companies that are creating some negative environmental or social outcomes. To reduce the risk of significant negative outcomes, the Fund does not hold investments in companies that breach the exclusion or negative alignment criteria set out below.

Sustainability approach

What the Fund invests in:

- The Fund invests at least **90% of its assets in shares of companies** whose products or services provide solutions to environmental or social challenges in line with its Sustainability Themes.
- These investments are assessed and selected using Columbia Threadneedle's Standard of Sustainability (**the "Standard"**).
- An investment is identified as sustainable if it meets the Standard in the following ways:

1. The investment aligns with the Sustainability Themes

We identify sustainability challenges that an investment helps to solve, linked to the Fund's Sustainability Themes. These themes align to the United Nations Sustainable Development

Goals framework¹. Solutions under this framework can include products or services that help meet those sustainability challenges (see examples, right); and

2. The investment meaningfully contributes to the Sustainability Themes

We assess how significant the contribution of an investment is to the Themes by reference to a company's revenues. To meet the Standard, a company must generate 50% or more of its total net revenue from products or services providing solutions aligned to the Sustainability Themes.

Net means we subtract any revenues that are negatively aligned to the Themes from revenues that are positively aligned, to ensure that the sustainable segments of the company's business are the largest part.

Sustainability Themes

Energy Transition – provide affordable and clean energy or improve energy efficiency

Resource Efficiency – promote more sustainable resource use, consumption and production

Sustainable Finance – support both financial inclusion and businesses addressing sustainability challenges

Sustainable Infrastructure – enable less damaging construction processes to maintain sustainable networks

Societal Development – support education and training and improve social mobility for underrepresented groups

Health and Wellbeing – advance global health, wellbeing, nutrition and food security

Technological Innovation & Inclusion – provide innovative hardware or software solutions to sustainability challenges

What the Fund does not invest in:

- **Exclusions:** The Fund will not invest in issuers with, for example, significant exposure (based on revenues) to certain activities that conflict with the Sustainability goal of the Fund, including the production of weapons or tobacco products, the extraction of coal, oil and gas or issuers breaching international standards of business conduct, such as the United Nations Global Compact. The full list of exclusions, and any permitted exceptions can be found [here](#).
- **Negative alignment:** The Fund will not invest in companies with total net revenues that are less than 0% aligned with the Sustainability Themes, as this indicates that most of the business is focused on activities that may conflict with the Themes.

¹ An internationally developed framework of 17 goals and 169 underlying targets that set out a roadmap to a more sustainable world by 2030.

Other assets:

The Fund may also invest up to 10% in assets that do not pursue the Sustainability goal, including investments which do not currently meet the Standard (i.e. companies with 0 – 50% total net revenues from sustainable solutions) or assets which are held for the purposes of liquidity or risk management, such as deposits and cash.

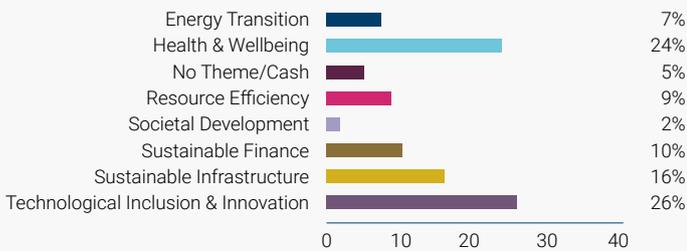

Engagement:

We engage with companies to better understand how they are providing solutions to environmental and social challenges aligned with the Sustainability Themes, and to encourage better management of environmental, social and governance (ESG) issues.

Sustainability metrics

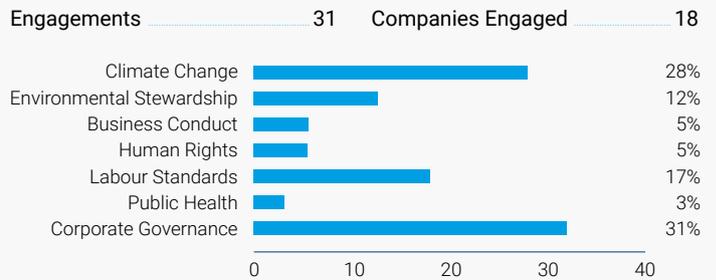

The Key Performance Indicators (KPIs) measure how the Fund is performing against its sustainability goal. We monitor and report annually on the KPIs. In next year's disclosure, we will report on additional KPIs (detailed in the prospectus).

KPI: Portfolio alignment to Sustainability Themes

Below is a summary of the additional metrics we use to measure the sustainability characteristics of the Fund:

Annual engagement summary

Exclusion criteria

We can confirm that no investments were made in companies that breach the exclusion criteria during the reporting period.

Metrics are as at 31 December 2024 but subject to change without notice and not indicative of the future funds characteristics. Third party data may be subject to limitations in respect of its accuracy and / or completeness.
